

Kitchen Remodeling Tips:

Today the kitchen has become central again. At some point you will probably make the decision to remodel your kitchen. In Naples, Bonita Springs, Marco Island, and Estero, Florida, just like across the country, remodeling your kitchen is an easy way to increase the value of your home and alter the look and feel of your piece of paradise, creating a warm and functional family/entertaining space.

A kitchen remodeling project can be a small, simple one or two item makeover or an extensive custom remodeling job. One needs to consider Objective, Function, Design, Budget, and Getting It Done. Granite Development LLC, a custom remodeling expert, advises that a well-thought-out, detailed plan is a must for any kitchen project.

In any kitchen remodeling plan you need to consider space planning and finish materials. Here are some primary items to consider in your kitchen remodeling plan:

Work Stations: single or multiple.

Cabinets: style, quality, price.

Countertops: surface choice is most important. Countertop choices range from very durable, yet very expensive materials like solid surface or granite to the less expensive, but attractive choices of ceramic tile and laminates. Solid surface, marble and granite tops are not typical do-it-yourself materials.

Flooring: tile, wood, etc.

Kitchen Sinks: sink style and material, deep or shallow bowl, faucet style and material.

Appliances: the main appliance choice involves built-in or free-standing styles. This decision definitely factors into the overall design. Specific style and color choices are very important.

Lighting: where to place lighting, type of fixtures etc.

Water Filtration: Built in, under the sink, on the faucet.

Remodeling a kitchen can be great fun. It offers the opportunity to create a more energy-efficient kitchen and to create a space where the family can relax. Let a custom, professional remodeling company help you plan and create your new kitchen.
